QUICK TIPS

- Come with pictures of designs and colors that you may like.
- Know which selections are standard for your home and which may be an upgraded feature.
- Consider the best choices for your lifestyle. Entertain often? Home automation can be utilized to turn an ordinary home into a spectacular one. Have pets? Higher quality carpet or tile throughout the home might make life easier for when accidents happen.
- Think ahead about colors, cabinet finishes, appliances, counter-tops, plumbing fixtures and flooring. We have visuals located in The SHOP to help understand the design process, but nothing is better than the design ideas that you come with.
- Bring cushions, paint swatches, or photos of your major furniture pieces to coordinate color schemes.
- Consider maintenance requirements of certain materials you are considering, like flooring, counter-tops, etc.
- Expect variations. With any handcrafted work of art, science, natural materials or personal craftsmanship, you can expect items you select to vary somewhat from the model and other homes in the area. Every home is a brand new work of art.
